Free stuff you can claim with your student email

Discussion

Spent way too long compiling this, so figured I'd share. Everything on this list requires student verification not generic free trials that anyone can get. Start with the GitHub Student Pack because it unlocks a lot of free services automatically, then work your way down.

- **Amazon Prime Student** – Cheaper plan with the same benefits as regular Prime.
- **GitHub Student Pack** – The big one. Unlocks most of this list + Copilot Pro free. (education.github.com/pack)
- **JetBrains** – All IDEs free (CLion, IntelliJ, PyCharm, etc.) (jetbrains.com/student)
- **Cursor Pro** – 1 year free AI code editor (\$240 value) (cursor.com/students)
- **Google Gemini AI Pro** – 1 year free, includes Deep Research + 2TB storage. (gemini.google/students)
- **Autodesk** – AutoCAD, Fusion (PCB/CAD), Maya, all free for 1 year (autodesk.com/education)
- **Azure for Students** – \$100 cloud credits, no credit card needed (azure.microsoft.com/free/students)
- **AWS Educate** – \$50–100 AWS credits (aws.amazon.com/education/awseducate)
- **Ansys Student** – Free simulation suite (mechanical, CFD, etc.)
- **Figma** – Professional plan free (figma.com/education)
- **Spotify** – Discounted Premium subscription for students.
- **Canva for Education** – Free premium features for students and teachers.
- **MATLAB** – Check if your university has a campus license (most do)
- **Microsoft 365** – Free access to Word, Excel, PowerPoint, and more with a college email
- **Notion** – Plus plan free (notion.com/education)
- **1Password** – 1 year free password manager (via GitHub Pack)

Also, feel free to comment any other services for .edu

Fusion360 is free for students on a rolling basis. Every year you can re-up it for free as long as you have access to the .edu email address.

Most Autodesk apps are also like that I believe

Most everything listed here as a 1 year is just "one year till we ask to verify your student email again"

This is also just free for non-students, but without a few features. Most people won't notice the difference. I only don't get the unwrap feature and sheet metal tools.

I've also switched to OnShape which is the same (free but the pro version is given to students at no cost)

Watched the office for the seventh time... I already know all of the jokes so it's barely even a distraction

Helpinmontana • 3mo ago

Tossing it in there-

Almost every paid news site has a free student or cheap student account

You mean to tell me I've been using the free version of Canva and Notion this whole time when I could've had them for free? Dang, I know about a lot of student discounts but wish I'd known those.

There's a ton of student discounts. Everything from fast food places to insurance, so always ask. And make sure you're taking advantage of what your specific university gives you and local things. For example, I get

Gemini for students supposedly expired TODAY, in my region (US) any fix? Very interested but I'm a tad late

Taos87 • 3mo ago

RemindMe! 5 months

DrDreamfinder • 3mo ago

Google Gemini AI Pro says 1 month free, not 1 year.

alfafire12 • 3mo ago

i had the same issue but i went through the prompts and when i scrolled down it said 1 year

DrDreamfinder • 3mo ago

Oh nice, I'll have to try then.
